Note:

1. The above is a comparison between similar courses offered by NUS, NTU and SMU. Do note that the courses may not be exactly the same, e.g. NUS offers Business Admin (Accountancy), while NTU and SMU offer Accountancy.

2. The above are the representative grade profiles of the 10th percentiles of applicants offered places in the University Admissions for applicants holding S'pore-Cambridge GCE A-Level qualifications. The grade profiles refer to the grades scored by successful A-Level applicants in their 3 H2 and H1 subjects. For the purpose of this exercise, Grade "C" is assumed for both General Paper (GP) and Project Work (PW) in determining the grade profiles. Note that certain courses may require grades higher than "C" grade for GP. Also, there could be other "equivalent" profiles for each course. For example, a grade profile of ABC/C could be considered to be broadly equivalent to BBB/C, unless there are pre-requisites.

3. Meeting the previous year's grade/GPA scores of a course does not guarantee admission into that course for the current year.

4. If the 10th percentile grade profile is ABC/A (3H2,1H1), it means that 90% of the applicants offered places score above ABC/A. Do note that since 2004, MOE has introduced the discretionary admissions (DA) framework where up to 10% of students can be offered admission based on criteria other than their academic grades. This would include, typically, special talents, leadership skills or an outstanding record of co-curricular activities. The academic performance of students who are offered under DA will not be indicative of the academic requirements for admission and are, therefore, not included in the indicative grade profile.

5. Certain programmes may have specific subject requirements. The programmes marked with asterisk (*) are those where additional assessments such as interviews, selection tests, and /or portfolios are required.

6. Certain Degree programmes are not reflected here as the IGP for these are not published.

7. Please note that this information is collated from the various University sites; students should only rely on this document as a guide.
